

## Technical Data

- ■ materials steel / stainless steel
- ■ pressure stages PN 10 – PN 64
- ■ working pressure from 1,0 bar
- ■ filter-finenesses larger than 1  $\mu\text{m}$  with filter bags
  - ■ continuous filtering process without interruption during changing of the filter-element
  - large filter areas for very long service times
  - fine filtration up to 1  $\mu\text{m}$  possible
  - very well suited for aggressive mediums
- ■ circulatory capacity 0,5  $\text{m}^3/\text{h}$  – 500  $\text{m}^3/\text{h}$
- ■ size from DN 50 up to DN 300
