

Single Filter Type EFBS

Single Filter Type EF

Technical Data

- materials steel / stainless steel
- pressure stages PN 10 – PN 64
- working pressure from 1,0 bar
- filter-fineness larger than 1 μm with filter bags
- larger filter area compared with dirt collectors
- housing size variable with equal connecting flanges
- large filter areas for very long service times
- fine filtration up to 1 μm possible
- very well suited for aggressive mediums
- circulatory capacity 0,5 m^3/h – 500 m^3/h
- size from DN 50 up to DN 300
