

## SCHEDULE OF ARTICLES

### Separator Type SPR

page 1 / 1

Separator for separation of solids with high specific gravity, in compact closed inline-construction.

Design in materials: plastic, steel, stainless steel

The discharge of the concentrate is carried out continuously without process interruption.

medium	:	.....
temperature	:	°C .....
main connection flanges according to DIN PN 10	:	mm .....
circulatory capacity	:	m <sup>3</sup> /h .....
separation depending on difference of specific gravity, pressure differential, viscosity and solid matter concentration	:	micro m .....
working pressure	:	bar .....
design pressure	:	bar 10
pressure loss with clean filter approx.	:	bar
weight empty	:	kg .....
<u>materials</u>	:	plastics, steel, stainless steel

### accessories

1 concentrate discharge valve G ½" – product contacting parts rubberized with transparency flexible tube of PVC

2 mounting clamps

In order to avoid clogging of the slotted tube of the Separator a pre-cleaning of ~ 5 mm is necessary.

dimensions acc. to drawing : no. ....

higher pressure stages and other materials deliverable on demand.

Manufacturer : Dango & Dienenthal, Filtertechnik GmbH
